<b>Description</b>			
I found a little bug in extra\svn\reposman.rb file.			
When I run this script to create svn repository under Windows Server 2003, it failed: unable to create D:\SVNRepo\test1 : undefined method `uid' for nil:NilClass			
I checked the code and found the function "set_owner_and_rights", so I try to modify this line: if RUBY_PLATFORM =~ /mswin/ to: if mswin? The problem fixed.
