<b>Description</b>			
<p>I'm creating new project. On New project page I filled entire form, clicked Save. There was an error, so page reloaded, in the upper part is error in red field. All form elements are rendered in correct state (I believe), but Checkboxes in Modules section are all turned on, even I preselected only few of them. Correct behaviour should be that selection of modules will keep the same as selected by user.</p>
