Redmine - Defect #8028

Migration error under MSSQL 2000

2011-03-31 08:19 - Petr Pospisil

Status:	Closed		**Start date:**	2011-03-31
Priority:	Normal		**Due date:**

Category:	Database		**Estimated time:**	0.50 hour
Target version:				
Resolution:	Wont fix		**Affected version:**	1.1.2

Description

Hello,

I tried to install the Redmine on MSSQL 2000 and I had to change a migration file, because some kind of error occured on MSSQL side. (cannot change a column because it is in use by other object)

091_change_changesets_revision_to_string.rb
----
line 3 change_column :changesets, :revision, :string, :null => false
----

patched:
remove_index :changesets, :name => :changesets_repos_rev
change_column :changesets, :revision, :string, :null => false
add_index :changesets, [:repository_id, :revision], :unique => true, :name => :changesets_repos_rev

Regards
Petr

History

#1 - 2011-04-03 18:13 - Jean-Philippe Lang

MSSQL is not officially supported (and totally untested) but I'm curious about how Redmine behaves with it.
Did all other migrations run fine?

#2 - 2011-04-09 23:12 - Petr Pospisil

yep, only this one.

But I don't know if all pages are working as expected, I tested only migration.

#3 - 2017-09-24 04:04 - Go MAEDA

- Status changed from New to Closed

- Resolution set to Wont fix

Since SQL Server 2000 is too old, I am closing this issue.
