

Redmine - Patch #820

NoMethodError in SearchController

2008-03-10 00:20 - Angel Sciortino

Status:	Closed	Start date:	2008-03-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Search engine	Estimated time:	0.00 hour
Target version:	0.7		

Description

Submitting an invalid project id to a search results in a NoMethodError from a nil object.

```
You have a nil object when you didn't expect it!  
The error occurred while evaluating nil.active?
```

```
app/controllers/application.rb:105:in `check_project_privacy'  
app/controllers/search_controller.rb:41:in `index'
```

This patch checks whether the project exists first, and a 404 page is displayed instead. Test included.

Associated revisions

Revision 1237 - 2008-03-12 21:50 - Jean-Philippe Lang

Fixes #820: invalid project id causes a NoMethodError in SearchController (Angel Dobbs-Sciortino).

History

#1 - 2008-03-10 02:29 - Angel Sciortino

Applies cleanly to [r1212](#).

#2 - 2008-03-12 21:51 - Jean-Philippe Lang

- Category set to Search engine
- Status changed from New to Closed
- Target version set to 0.7

Patch applied with slight changes in [r1237](#) (used a before_filter instead).
Thanks
