No.

@changeset.previous, @changeset.next and :size => 8 are hardcoded.

And, there is no functional test.

Because of the improvement made in [r16911](#), we can switch between `RepositoriesController#revision` page and `RepositoriesController#diff` page with tabs. So both pages are look like same page. However, `RepositoriesController#diff` page does not have Prev/Next navigation.

I think it is very natural for `RepositoriesController#diff` page to have prev/next navigation.

"Changes" tab (`RepositoriesController#revision`):

Revision 11 « Previous | Next » 11 OK
