

Redmine - Feature #883

Add suport for mobile devices (CSS)

2008-03-18 00:00 - Maxim Krušina

Description Add basic support for mobile devices. This can be done easily by creating special version of CSS dedicated for mobile devices like phones, PDAs, etc. When on-the-go (stucked in the tram in traffic jam :), I'm using my PDA phone to solve some business, especially creating new tickets from client's emails. Redmine works in Pocket IE or Opera (preferred), but special light-weight CSS optimized for mobiles would be very appreciated. Anyone else interested? I'm total lamer in Ruby, but I can try to modify CSS.

I like the idea a lot as well. I'm no Ruby-Coder either but would be glad to support the CSS-Tasks as soon as I have time.

#2 - 2008-03-21 09:34 - Maxim Krušina

I can't assign ticket to me, here, but we're starting to create Mobile CSS, hurrah!

- Status changed from New to 7

- Assignee set to Maxim Krušina

#4 - 2009-05-28 08:32 - Tobias Stuesson

Are there any news on this?
Would be a really exciting feature!!!

Any updates here?

#11 - 2012-01-28 22:49 - Predrag Radovic

- *File application_handheld_css.diff added*

- *File base_layout_kindle_handheld_support.diff added*

Very basic (font-size) patches for handheld CSS (like Kindle Touch) are attached.

Any update?

#13 - 2012-12-04 18:33 - Raphael Kallensee

I think the best option would be to make the default theme more responsive (in sense of [Responsive Webdesign](#)). This shouldn't be too much work, but require some template/CSS/JS changes.

A great first step is the "Redmine Responsive Design Theme" from Xander Dumaine. He described it in a [blog post](#) and he has a [Redmine project](#) where the sources can be found (his Redmine installation also uses his theme, so you can try it out over there).

A newer approach to solve this, would be the usage of media queries.

With this technology, there's a good way to customize the display of Redmine depending on the window width.

This implementation won't be easy, as there are many rules which needs to be tweaked.

#16 - 2013-11-11 06:04 - Maxime Vez

+1 for a native responsive design theme in Redmine, so we can access it from all form factor devices.

#17 - 2013-11-21 10:58 - Robert Barnebeck

+1 Would be great!
