Description

Issues list contains only 2 columns after first click on Apply.

After second click on Apply, the columns show as usual.

What is interesting is that columns also disappear (after first click, they are there before!) from Settings > Columns. After second click they reappear.

Tested in IE8,FF5,Chrome12. I'm attaching 3 screenshots how it behaves in 3 steps.

This defect started after upgrade from Redmine 1.1.1 to 1.2.1 (all done according to RedmineUpgrade page).

Output of script/about:

- Status changed from New to Resolved

Ok, that was it, thanks for heads up.

For others: Problem was old redmine_xls_export plugin, upgrading to version 0.1.3 did the trick.

Thanks again.
