<b>Description</b>			
There should be a facility to copy a project with another name. E.g if i have a project name pilot and have defined the workflow users and settings for it . It would be helpful to copy it with another name and then customize the copied project.

Just tried this out, Issues were copied over successfully. However, documents were not. Shouldn't the copied project also have the original project's documents as well?

Please open a new Feature request for coping Documents. You can reference this issue ([#886](#)) and another issue if you'd like ([#3367](#)).

Side Note: This issue should have been Closed instead of Resolved.

Looks like it was created as [#5664](#). I'd like to see this feature as well for the same reasons noted in the other job.
