Yes, I think to we can remove these unused fonts.

- *Status changed from New to Closed*

- *Target version set to 1.2.2*

Removed unused fonts except DejaVuSans-BoldOblique in trunk <r6441> and 1.2-stable <r6443>.

What's the status of helvetica*.rb ? Is it used, if yes, where are the font files so that we can generate from them using ttf2ufm ?

#4 - 2011-08-19 01:24 - Toshi MARUYAMA

helvetica*.rb is used at <source:trunk/lib/redmine/export/pdf.rb@6460#L74>.

Redmine 1.2 supports switching embedded or non-embedded font by "general_pdf_encoding" at <source:trunk/config/locales/en.yml@6460#L140>.
