Redmine - Patch #9037

Setting labels should be connected to their fields

2011-08-11 09:56 - Alex Shulgin

Description

Attached patches fix two problems:

1. In Admin > Settings, labels were not connected to their fields.
2. The checkbox label didn't work because of the hidden helper field was having the same id as the checkbox.

There're also a couple of checkboxes under Settings > Repositories, which do not have labels at all (only text): you have to click at the checkbox itself to (un)mark it. I've tried to use labels there, but the CSS appears to be too messy to make this work: the labels get rendered behind the left edge of the screen...
