**Description**

What can be great to have one global Wiki, which will be related no to project but to whole instance of Redmine. Our company is using mediawiki yet, but I would like to swich to Redmine completely, so there will be one app less ;)))

PS: what about MediaWiki importer? Is it complicated?

## History

**#1 - 2008-03-21 09:32 - Maxim Krušina**

"Wiki" menu item can be in the tompost menu

**#2 - 2008-04-24 02:50 - Leandro Lucarella**

I think this will be really great. It could boost Redmine to be a simple CMS for website mostly dedicated to host projects.

I hope this feature request will be with high priority =)

Thanks for the great software!
