Category:	SCM	**Estimated time:**	0.00 hour
Target version:			
Resolution:	Duplicate	**Affected version:**	1.2.1

Description

Hi,

I would like to update ticket by commit for related project(parent or child).

While check changesets.rb, I aware such code exists:

```
  def find_referenced_issue_by_id(id)
    return nil if id.blank?
    issue = Issue.find_by_id(id.to_i, :include => :project)
    if issue
      unless issue.project &&
                 (project == issue.project || project.is_ancestor_of?(issue.project) ||
                  project.is_descendant_of?(issue.project))
        issue = nil
      end
    end
    issue
  end
```

However ":include => project" condition seems to prevent following code.

Why don't you permit referencing changesets for related project's scm?

regards,

Takashi Okamoto
