Redmine - Feature #9306

Per-tracker issue categories

2011-09-22 15:11 - Lars Erik Gullerud

Status:	New	Start date:	2011-09-22
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:			
Resolution:			
Description			
-	useful when defining categori cts what trackers are used in	-	t trackers this category is valid for (similar to
Case example:			
do a design for th responsible for a	nat area. However for "bugs"	racker there are a lot more categories as d be able to select!) all these categories i	s who will follow up the feature request and these are assigned to individual engineers in the "feature" tracker makes our users
	uld split every single project ir ever this is a less than optima	to sub-projects and have only one tracker I workaround	r (and one set of categories) in each

categories ? mmmh ...

I was thinking on a similar/same need, for example, if you do a change that a customer needs to beta-test, think about hardware-specific customers

Closed

We could have a system like tags, for example to send notifications to the customers that has X-tagged specific hardware to betatest the new change

+1

It could be made as the plugin below

https://github.com/nanego/redmine_per_tracker_categories

This is very useful, do not know why redmine does not have this feature.
