Assignee:			**% Done:**	0%
Category:	Administration		**Estimated time:**	0.00 hour
Target version:				
Resolution:	Invalid		**Affected version:**	1.2.1

Description

Hi

we have strucutred redmine wik issues organized in task and subtask.
sometimes we need to move tasks and related subtask between versions to delay or escalate a feature.

now is a very hard operation, specially for task with tols of subtasks related.

i have serached but i havn't found anithing that help me nor in google and in help.
anybody can help me?

Max

History

#1 - 2011-12-04 12:14 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Invalid

You can add parent column issue in issues list, sort list with this column to get you parent task and all subtasks together, then select all of them (with CTRL+click or using checkboxes) and use the right click context menu to set a different version for all of them in a row.
