<b>Target version:</b>	<b>Affected version:</b>
<b>Resolution:</b> Duplicate	
<b>Description</b>	
<p>I've just migrated to the 1.3-stable branch (Redmine 1.3.0.stable.8106 (MySQL)) and I'm experiencing the following issue: I can see issues from other projects inside a project if I change the tab from Gantt to Issues, but select a custom query before change. The tab switches ok, but the result is not filtered by project.</p> <p>The following steps reproduce the problem.</p> <ul style="list-style-type: none"><li>• Create a custom query that matches tickets in more than one project (Mine is: status=open, assignee=&lt;me&gt;, %done&lt;=90)</li><li>• Make sure to have issues that matches your query in more than one project, and make sure to fill the dates to allow this issues to appear in gantt.</li><li>• Open the issues tab inside one of the projects</li><li>• Click 'show all issues' in case you have a custom query selected</li><li>• Click your custom query</li><li>• Change to Gantt tab</li><li>• You should see issues for other projects inside the gantt</li></ul> <p>You can reproduce going in Gantt first, just change the order of tabs visit and clear any custom query using 'show all issues' before start.</p> <p>It seems that redmine forgets the current project when the tab is changed. If you click 'apply' or reselect the custom query the problem does not occur again.</p> <p>I'm putting devel as affected version because I couldn't reproduce on demo.redmine.org, so I'm assuming that it's specific to 1.3.</p> <p>Following my environment:</p> <pre>Ruby version      1.8.6 (x86_64-linux) RubyGems version  1.3.7 Rack version      1.1 Rails version     2.3.14 Active Record version  2.3.14 Active Resource version 2.3.14 Action Mailer version 2.3.14 Active Support version 2.3.14 Application root  /opt/redmine/redmine-1.3 Environment       production Database adapter  mysql Database schema version 20110902000000</pre>

Is duplicate of Redmine - Defect #9738: Setting of cross-project custom query...	<b>Closed</b>

### History

#### #1 - 2011-12-07 14:06 - Bruno Medeiros

I think it's related to [#9738](#), even duplicates it. This is a little different bug, but I think solution will be the same.

#### #2 - 2011-12-07 22:36 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Duplicate

Indeed, it's the same. Fixed in [r8113](#).
