- Affected version (unused) set to 1.2.2

- Affected version set to 1.2.2

#4 - 2011-12-15 10:55 - Stefan Halter

I can report similar behavior in our system. It works fine with newly created projects, but does not work with "old" projects. We recently upgraded Redmine from 0.9 to. 1.2.2. Some days ago we upgraded to latest stable 1.3.

- if I copy an issue from (1.3) project A to a (created under 0.9) project B = failure
- if I copy an issue from (created under 0.9) project B to a (1.3) project A = works
- if I copy an isuse from (1.3) project A to a (created under 1.2.2) project B = works

In each case I changed tracker and project. We really need to have this working!

#5 - 2011-12-15 11:04 - Etienne Massip

Could that be related to (mandatory?) custom fields used in each project?

#6 - 2011-12-15 11:08 - Stefan Halter

Good hint! It works perfect!

#7 - 2011-12-15 14:14 - Salim B

Stefan, what did you do exactly ? removed custom fields or made those non mandatory ?

#8 - 2011-12-15 14:25 - Stefan Halter

I had one mandatory custom field in "Project B". After deselecting that "mandatory" box both projects (from project A to project B) have equal requirements.

#9 - 2011-12-15 14:46 - Salim B

OK, same result here. I managed to make it work by making 3 custom fields non-mandatory

#10 - 2011-12-15 14:52 - Etienne Massip

- Status changed from New to Closed

- Resolution set to Duplicate

Closed as duplicate of #6859.
