**Description**

Is it possible to have a GUI setting to control the secure flag on the session and autologin cookies?  I was able to set them by making the changes below:

```
app/controllers/account_controller.rb
cookies[:autologin] = { :value => token.value, :expires => 1.year.from_now, :secure => true }

config/environment.rb
ActionController::Base.session_options[:session_secure] = true
```

thanks!

Any plans to implement this ? I think it's needed to avoid HTTP Session hijacking ?
