Target version:			
Resolution:	Duplicate	**Affected version:**	1.2.0

Description

I am using a german Language Setup

```
number:

  1. Default format for numbers
     format:
     separator: ','
     delimiter: '.'
     precision: 2
```

and

```
general_csv_decimal_separator: ','
```

(Like changed in #2131)

The following problem occured:
When you export a CSV from your time entries
(<your redmine>/projects/<your project>/time_entries) all times are written with ",".
If you export a CSV from a time report (<your redmine>/projects/<your project>/time_entries/report) all times are written with a "."

I guess that the report is not considering the language dependend seperators but could not look inside the code right.
All i know is that the seperators should be the same for time values, no matter if you export them in the details or the report.
