

Paste screenshots into the body of an Issue in Redmine: Plugin

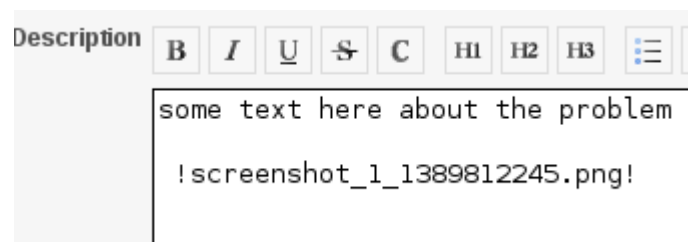

Using Plugin: https://github.com/credativUK/redmine_image_clipboard_paste

Screenshots:

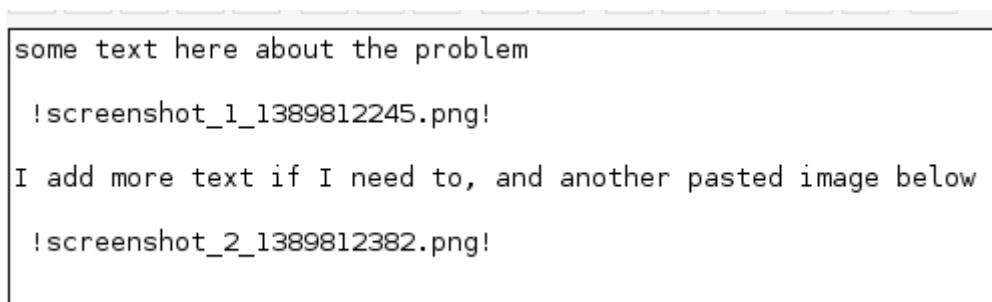

You start your issue Update by typing in some text:

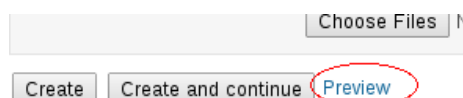

Then I take a screenshot of the problem page: and paste it into the Issue: it shows as the 'screenshot' text line as follows

I can then add text below the screenshot, and maybe another screenshot too if needed:

I want to check what my update will now look like, when in RedMine and when emailed out: so I click the 'Preview' link :

To see this: both images in full, and the text before and after, just as I wanted it:

Create Create and continue Preview

Description

some text here about the problem

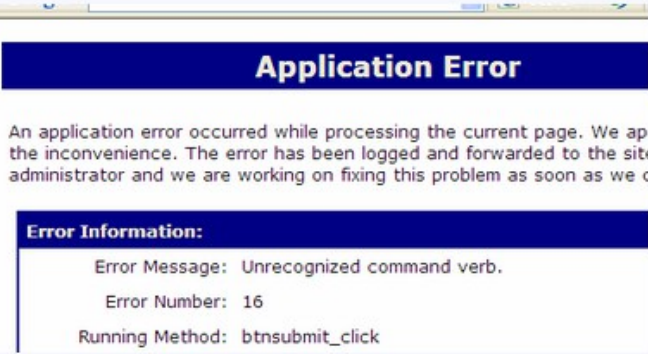

Server Error in '/' Application.

Runtime Error

Description: An application error occurred on the server. The current custc the application error from being viewed remotely (for security reasons). It could server machine.

I add more text if I need to, and another pasted image below

Application Error

An application error occurred while processing the current page. We ap the inconvenience. The error has been logged and forwarded to the site administrator and we are working on fixing this problem as soon as we c

Error Information:

Error Message: Unrecognized command verb.
Error Number: 16
Running Method: btnsubmit_click
