<b>Description</b> It would be nice to have the ability to filter the Activity listing by user. I realize there might be some issues when it comes to matching the redmine user account with the source repo committer. My only thoughts for that are to just make a best guess and only use the redmine account, or maybe allow configuration in the user profile of their source repo alias for a given project?

Revision 2067 - 2008-11-30 13:12 - Jean-Philippe Lang

Makes activity view accept a user\_id param to show user's activity (#1002).

+1 from me. I browse the activity view when filling in reports at the end of the week. It would be of great help if I could select a single user to filter on.

#2 - 2008-11-30 14:59 - Jean-Philippe Lang

- Status changed from New to Closed
- Target version set to 0.8
- Resolution set to Fixed

Feature added in [r2071](#). You can now access user's activity page from its account page.  
Eg: [http://www.redmine.org/projects/activity?user\\_id=1](http://www.redmine.org/projects/activity?user_id=1)
