Description

Hello,

I have a project with some sub-projects, and I'd like to have a full breadcrumb in the pages of a sub-project.
It's not possible to link the main page of a sub-project with the main page of the main project...

Example :
main_project >> sub_project >> a_page
=> Impossible to have. I have "sub_project >>" when I see the page... I'd like to have "main_project >> sub_project" into this page.

Thanks.
