Description	
<p>Hello,</p> <p>I have a project with some sub-projects, and I'd like to have a full breadcrumb in the pages of a sub-project. It's not possible to link the main page of a sub-project with the main page of the main project...</p> <p>Example :</p> <p>main_project >> sub_project >> a_page => Impossible to have. I have "sub_project >>" when I see the page... I'd like to have "main_project >> sub_project" into this page.</p> <p>Thanks.</p>
