Description

Is it possible to get Redmine to send e-mail notification of file **downloads**, like it does for e.g. file uploads?

We'd like e.g. the project manager(s) to get notifications when files published by their project are downloaded, and who by - you have to be logged into our Redmine installation.

By files, I'm mostly thinking of those on the "Files" tab, but perhaps this also applies to "Documents" and attachments on issues and the wikis...

Is this possible with Redmine or a plug-in?

Heh, I guess this is related to requested feature #6039 that I raised a year ago.
