<b>Target version:</b>			
<b>Resolution:</b>	Fixed		
<b>Description</b> Would like support to be able to bind the parent issue via the REST API.  E.g., on the Post:  <code>&lt;parent_id&gt;19&lt;/parent_id&gt;</code>  This would bind the created/update issue to Parent issue with id 19.			

History

#1 - 2012-01-30 12:11 - Etienne Massip

- Category set to REST API
- Priority changed from High to Normal

#2 - 2012-02-03 09:56 - Charles Shapiro

After researching the source, it looks like the post parameters needs to be changed to:  
<parent\_issue\_id>19</parent\_issue\_id>

This contradicts how it downloads in xml and also what it's named in the database.  
  
Possibly just a documentation update on the wiki would suffice.  
  
Thanks.

#3 - 2012-02-03 10:00 - Charles Shapiro

- Status changed from New to Resolved
- % Done changed from 0 to 100

wiki updated...closing

#4 - 2012-02-03 10:52 - Etienne Massip

- Category changed from REST API to Documentation
- Status changed from Resolved to Closed
- Resolution set to Fixed

Thanks.
