Description

Would like support to be able to bind the parent issue via the REST API.

E.g., on the Post:

```
<parent_id>19</parent_id>
```

This would bind the created/update issue to Parent issue with id 19.

History

#1 - 2012-01-30 12:11 - Etienne Massip

- Category set to REST API

- Priority changed from High to Normal

#2 - 2012-02-03 09:56 - Charles Shapiro

After researching the source, it looks like the post parameters needs to be changed to:

```
<parent_issue_id>19</parent_issue_id>
```

This contradicts how it downloads in xml and also what it's named in the database.

Possibly just a documentation update on the wiki would suffice.

Thanks.
