<b>Description</b> Hi,  is it a way to set field values throw the url of new issue? for example like: <a href="http://www.redmine.org/projects/redmine/issues/new?Priority=High">http://www.redmine.org/projects/redmine/issues/new?Priority=High</a>  Or maybe other way to send parameters to the new issue? If this feature is not implemented, it could be nice to have one.  Thanks  Regards Dimitri
