I made modifications to redmine\_watcher\_groups plugin to run it with Redmine 3.1.1.

See [\[\[https://github.com/foton/redmine\\_watcher\\_groups.git\]\]](https://github.com/foton/redmine_watcher_groups.git)

redmine\_watcher\_groups allows you to add watchers individually or/and by group. On Issue create or update.

I have attempted many different "watchers by group" plugin installations on a local redmine testbed (bitnami redmine, redmine at v3.2). Has anyone gotten this plugin mentioned (redmine\_watcher\_groups) to work with Redmine 3.2?

Thanks
