

Redmine - Defect #10124

Unable to select Status after changing an Issues Tracker

2012-02-01 11:17 - Florian Mueller

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Issues workflow	Estimated time:	0.00 hour
Target version:		Affected version:	1.3.0
Resolution:	Fixed		

Description

Hi,

Steps to reproduce:

I assume the trackers "bug" and "feature" exist. Now add a new status to feature which does not exist in the bug-workflow, e.g. "accepted" (and add that to feature's workflow).

Create a new feature, set the status to "accepted" and save it. Now update it and set the tracker to "bug" and save it again.

Now you are not able to change the status of that issue anymore, because there is no transition defined for status "accepted" to another one inside the bug's workflow.

Proposed Solution:

Fallback to the first status if the status set is not available in the current tracker's workflow.

Regards, Florian

At least Redmine 5.1 works that way. The default status for the tracker is selected in the "Edit" form if the original status is not allowed in the currently selected tracker.

Perhaps the behavior changed when [#5991](#) was implemented in Redmine 3.0.0. Please see the comment at [source:tags/3.0.0/app/models/issue.rb#L292](#).

```
# Sets the tracker.
# This will set the status to the default status of the new tracker if:
# * the status was the default for the previous tracker
# * or if the status was not part of the new tracker statuses
# * or the status was nil
def tracker=(tracker)
```
