Revision 8752 - 2012-02-02 20:45 - Jean-Philippe Lang

Fixed broken italic text style in edited comment preview (#10130).

History

#1 - 2012-02-01 19:24 - Etienne Massip

- Status changed from New to Confirmed
- Target version changed from 1.4.0 to 1.3.1
- Affected version (unused) changed from devel to 1.3.0
- Affected version set to 1.3.0

#2 - 2012-02-02 20:46 - Jean-Philippe Lang

- Status changed from Confirmed to Closed
- Assignee set to Jean-Philippe Lang
- Resolution set to Fixed

Fixed and merged.

#3 - 2012-02-02 20:58 - Etienne Massip

- Status changed from Closed to Reopened

I thought I would have fixed it simply by moving the preview div in [source/trunk/app/views/journals/\\_notes\\_form.html.erb](#) after the form, but because my dev env has been blocked for hours by a @#! long git fetch process and I couldn't test this fix.

Don't you think it would be a clean move? Issue update form preview div is not in the form and it make more sense to me since it does not contain any input control...

#4 - 2012-02-02 21:18 - Jean-Philippe Lang

- Status changed from Reopened to Closed

The div can not be moved out of form without adding some div and changing some javascript (try to edit and cancel). I won't do it in the stable branch so I reverted the change. I've added a specific css class in trunk ([r8754](#)) to target the form tips more accurately.
