Resolution:	
Description	
<p>We have created some predefined filters at issue page (by Category, by Status, by Target version). By default they show issues assigned to all users. If I would like to use this filters to show issues assigned to me, I can:</p> <ol style="list-style-type: none">1. add new filter Assigned to: <<me>>2. add new filter Assigned to: <<me>> and save it as new predefined filter. <p>Option 1 consumed some time and it isn't comfortable. Option 2 cause that We have many saved filters and mess at sitebar.</p> <p>Proposed solution is to add to sitebar checkbox: 'Assigned to me'</p> <p>When checkbox is selected all saved filters will use additional filter: "assigned to me", otherwise they will work as defined.</p>

- Description updated

I think that the solution is to clean up your saved query list.
