Redmine - Defect #10153

Missing "add new file" in Files section after upgrade from 1.0.0 to 1.3.0

2012-02-04 14:33 - Alessio Pollero

Status:	Closed		**Start date:**	
Priority:	Normal		**Due date:**	
Assignee:	Jean-Philippe Lang		**% Done:**	0%
Category:			**Estimated time:**	0.00 hour
Target version:				
Resolution:	Cant reproduce		**Affected version:**	1.3.0

Description
After upgrading from redmine 1.0.0 to 1.3.0 (latest stable release) i don't have the "add new file" button in the Files section of my project though i have the proper permission (Manage Files), why ? How can i solve this issue ? Ruby Version : ruby 1.8.7 (2010-06-23 patchlevel 299) [x86_64-linux] Redmine Version : 1.3.0.stable

History

#1 - 2012-02-04 14:35 - Alessio Pollero

Database : PostgreSQL 9.0

#2 - 2012-02-04 18:51 - Jean-Philippe Lang

- Priority changed from High to Normal

- Resolution set to Cant reproduce

Works ok for me on 1.3 stable.
Some changes were done in the files view, any plugins or custom code changes?

#3 - 2012-02-04 18:54 - Alessio Pollero

- Assignee set to Jean-Philippe Lang

I have this plugins installed :

- Localizable plugin 0.1.1
- Redmine Gitrevision Download plugin 0.0.8
- Redmine Light Box plugin 0.0.1
- Issues XLS export 0.1.3

#4 - 2012-02-04 19:32 - Jean-Philippe Lang

Make sure that none of these plugins override app/views/files/index.html.erb and that you don't have local changes.

#5 - 2012-02-04 19:56 - Alessio Pollero

Here's the content of my app/views/files/index.html.erb :

```
<div class="contextual">
<%= link_to(l(:label_attachment_new), new_project_file_path(@project), :class => 'icon icon-add') if User.curr
ent.allowed_to?(:manage_files, @project) %>
</div>

<h2><%=l(:label_attachment_plural)%></h2>

<% delete_allowed = User.current.allowed_to?(:manage_files, @project) %>

<table class="list files">
  <thead><tr>
    <%= sort_header_tag('filename', :caption => l(:field_filename)) %>
    <%= sort_header_tag('created_on', :caption => l(:label_date), :default_order => 'desc') %>
    <%= sort_header_tag('size', :caption => l(:field_filesize), :default_order => 'desc') %>
    <%= sort_header_tag('downloads', :caption => l(:label_downloads_abbr), :default_order => 'desc') %>
    <th>MD5</th>
```

```erb
      <th></th>
  </tr></thead>
  <tbody>
<% @containers.each do |container| %>

  <% next if container.attachments.empty? -%>
  <% if container.is_a?(Version) -%>
  <tr>
    <th colspan="6" align="left">
      <%= link_to(h(container), {:controller => 'versions', :action => 'show', :id => container}, :class => "i
con icon-package") %>
    </th>

 </tr>
  <% end -%>
  <% container.attachments.each do |file| %>
  <tr class="file <%= cycle("odd", "even") %>">
    <td class="filename"><%= link_to_attachment file, :download => true, :title => file.description %></td>
    <td class="created_on"><%= format_time(file.created_on) %></td>
    <td class="filesize"><%= number_to_human_size(file.filesize) %></td>
    <td class="downloads"><%= file.downloads %></td>
    <td class="digest"><%= file.digest %></td>
    <td align="center">
    <%= link_to(image_tag('delete.png'), attachment_path(file),
                                    :confirm => l(:text_are_you_sure), :method => :delete) if delete_allo
wed %>
    </td>
  </tr>
  <% end %>
  reset_cycle %>
<% end %>
  </tbody>
</table>

<% html_title(l(:label_attachment_plural)) -%>
```

#6 - 2012-02-06 08:50 - Etienne Massip

Plugins usually override a page by having their own vendor/plugin/<plugin name>app/views/files/index.html.erb (or .rhtml).

A good test would be to remove temporarily these plugins (especially Redmine Light Box plugin 0.0.1), restart Redmine and try to reproduce the issue without any plugin.

#7 - 2012-02-06 10:47 - Alessio Pollero

I don't have any plugin that override the files view, what could it be ?

```
/usr/share/redmine/vendor/plugins# find . -name index.html.erb
./engines/test/plugins/test_assets/app/views/assets/index.html.erb
```

#8 - 2012-02-06 11:25 - Etienne Massip

Still, I advise you to make a test with no plugins.

#9 - 2012-02-06 16:02 - Jean-Philippe Lang

A few more questions:

- can you post the piece of HTML that is generated and where the link should be present
- what happens when you access the new file form manually with this url: /projects/[project_id]/files/new

#10 - 2012-02-06 18:56 - Alessio Pollero

- File page.html added

- File ScreenShot.PNG added

If i go through direct URL link /projects/[project_id]/files/new i can upload files without any problem.
I even tried removing lightbox plugin but still the same problem .

I don't see the new File button, though it seems to be in the page source, could depends on the theme ?

Take a look at the screenshot in the attachment...

#11 - 2012-02-06 19:11 - Jean-Philippe Lang

- Status changed from New to Closed

Yes, it's a theme issue. The link must be just below your h2 background. Try to add a z-index to .contextual in your css.

#12 - 2012-02-06 21:30 - Alessio Pollero

Solved, it was a problem of the CSS, the element was set as hidden unreasonably :

.controller-files.action-index .contextual{ display:none; }

changed to :

.controller-files.action-index .contextual{ display:inline; }

Now it works.

Thanks.
