

Redmine - Defect #10156

Logout on Safari takes you to home screen (1.3.0)

2012-02-06 14:10 - Dominik Fuchshofer

Status:	New	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Accounts / authentication	Estimated time:	0.00 hour
Target version:		Affected version:	
Resolution:			
Description			
Some colleagues have a problem when they click on "Abmelden" (logout) on the right top corner of Redmine. They are taken to the home screen. A logout isn't possible. Problem occurs on Safari. Firefox and Chrome are working like a charme.

It seems OK on Safari 5.1.2, WinXP SP3 on my side.

It logs out and returns to redmine homepage correctly.

Thank you for your answer.

For better understanding I have made two screenshots. On the right top corner I click in Safari on "Logout":

<https://skitch.com/schoki/8f2pp/redmine>

I am taken to the home screen without logging out the user:

How about try on the online demo: <http://demo.redmine.org> ?

Or maybe we have to wait for the answer of the developer...
