Is there any plan to fix this issue?

#2 - 2014-05-10 20:21 - Grigory Kirichenko

It seems that we not only can't edit notes via REST API.

See <http://www.redmine.org/boards/1/topics/16513?r=29807>

We also can't ADD notes to issue through REST API.

Please write here if something changed.

Without this feature, there is no way to clean spam from Redmine websites in an automated way. This is a serious problem for our usage of Remdine.

#7 - 2022-03-23 08:13 - Mizuki ISHIKAWA

- File `add_put_journal_api.patch` added

This patch adds a PUT update API for journal.

This API has the following functions similar to those available from the page:

- Of the journal values, you can only update notes.
- When the notes of the journal that does not have the associated journal_details are changed to empty, the journal record is deleted.

Example:

```
curl -X PUT -d '{"journal": { "notes": "new notes" }}' -H "Content-Type: application/json" http://localhost:3000/journals/1.json?key=<api key>
```

#8 - 2022-03-23 15:27 - Go MAEDA

- *Status changed from New to Closed*
- *Assignee set to Go MAEDA*
- *Target version set to 5.0.0*
- *Resolution set to Fixed*

Committed the patch. Thank you for your contribution.
