

Redmine - Defect #10176

Custom fields of type "User" can't be ordered

2012-02-08 15:24 - Gonzalo Fernández-Victorio

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	Custom fields	Estimated time:	0.00 hour
Target version:		Affected version:	1.3.0
Resolution:			
Description <p>I cannot order a query by a custom Field of type Users of of type Version.</p> <p>This defect is similar to #9920. However, that one had two issues ("order_by in a project" and "query in all projects") and was closed as a duplicated of #9445. I understand that "query in all projects" is a duplicate of #9445 but "order_by in a project" keeps unresolved.</p> <p>I have managed to resolve for our own installation with the following modification (needs proper test and testing for being a patch)</p> <pre>--- custom_field.rb (Redmine Bitnami 1.3.0) +++ custom_field.rb (working copy) @@ -122,7 +122,7 @@ # Returns false, if the custom field can not be used for sorting. def order_statement case field_format - when 'string', 'text', 'list', 'date', 'bool' + when 'string', 'text', 'list', 'date', 'bool', 'user', 'version' # COALESCE is here to make sure that blank and NULL values are sorted equally "COALESCE((SELECT cv_sort.value FROM #{CustomValue.table_name} cv_sort" + " WHERE cv_sort.customized_type='#{self.class.customized_class.name}')" +</pre>
