

Redmine - Feature #1019

Role based custom queries

2008-04-08 17:01 - Paolo Sulprizio

Status:	Closed	Start date:	2008-04-08
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Issues	Estimated time:	0.00 hour
Target version:	2.4.0		
Resolution:	Fixed		
Description			
<p>It would be useful the possibility to save custom queries for roles.</p> <p>To save them in query edit, could be added a multiselection combobox with roles (and eventually another one with users) instead of "Public query" checkbox. The actual selected checkbox would correspond to the roles in the combobox all selected.</p> <p>Probably it should be also useful the possibility to configure is a role can create queries for every role, only for its role, for him or none. Otherwise, as now, only for administrators is possible to save role based queries.</p>

Role based custom queries (#1019).

History

#1 - 2010-08-23 19:49 - Paolo Sulprizio

Now that are implemented groups of users, it could be a per group custom query, if is judged to be more correct or useful.

#2 - 2012-03-02 21:04 - Darren Cook

+1 for this, I just ran into this issue where I want to create "public" queries for my manager and team, but don't want the rest of the user base seeing them. Role/Group/User permission would be very helpful. Thanks!

- Status changed from New to Closed

- Assignee set to Jean-Philippe Lang

- Target version set to 2.4.0

- Resolution set to Fixed

Feature added in r11994. Instead of a public checkbox, there's now 3 options. The second one lets you choose which roles are allowed to view the query:

#6 - 2013-08-05 10:57 - Tobias Fischer

great feature! But what happens to existing "public" queries?

| *great feature! But what happens to existing "public" queries?*

Existing public queries stay public (visible: to any users).

#8 - 2014-07-02 09:40 - Toshi MARUYAMA

- Related to Defect #17147: Public/private saved queries are not separated anymore added
