Revision 8866 - 2012-02-13 21:20 - Etienne Massip

Redraw revision graph on window resize (#10206).

History

#1 - 2012-02-13 10:21 - Etienne Massip

It'll end with a `Event.observe(window, 'resize', ...)`, I guess.

Does every resizing needs a redraw?

#2 - 2012-02-14 07:36 - Etienne Massip

- Resolution set to Fixed

Seeing all revisions, redrawing on resize seems to be:

- a bit painful for IE 9 which triggers multiple events even on simple maximize/minimize window
- almost smooth for FF 10 but it still takes a little time to redraw the graph
- perfectly smooth on Chrome 17, I was wondering if it actually redrew the graph and it did

A quick try to debounce was not very convincing...

Seems still very usable, what do you think Toshi?

#3 - 2012-02-15 05:54 - Toshi MARUYAMA

- *Status changed from New to Closed*

I confirmed [r8868](#) works fine on IE9 and Chrome 17.0.963.46 m on Windows.
