

Redmine - Patch #10242

Migrate Redmine.pm from Digest::Sha1 to Digest::Sha

2012-02-15 12:10 - Ales Zabala Alava

Status:	Closed	Start date:	
Priority:	Normal	Due date:	
Assignee:	Jean-Philippe Lang	% Done:	0%
Category:	Code cleanup/refactoring	Estimated time:	0.00 hour
Target version:	1.3.2		
Description			
<p>The helper perl module to integrate subversion repositories authentication with redmine uses Digest::SHA1. It would be far better to use Digest::SHA, since it's faster and maintained.</p> <p>Digest::SHA1 has been removed from Debian distributions, for example.</p> <p>The migration is quite simple, it's enough to rename all Digest::SHA1 to Digest:SHA.</p>
