Redmine - Defect #10254

Issues page links from the menu

2012-02-16 19:51 - Jan Jachacz

Target version:				
Resolution:	Cant reproduce		**Affected version:**	

Description

Hi,

I've (almost) set up the Redmine application on my server but i have a little issue about the page "issues".

The link from the menu is:
http://redmine.site.net/issues?project_id=my_project_id
This leads to a page error 500

But it should be:
http://redmine.site.net/projects/my_project_id/issues
Which is working

Same thing happens in the New issue form.

```
<form action="/issues?project_id=my_project_id" class="tabular new-issue-form" enctype="multipart/
form-data" id="issue-form" method="post">...</form>
```

Which prevents me from creating new bug.

Here is the error log:

```
Processing IssuesController#index (for XXX.XXX.XXX.XXX at 2012-02-16 13:45:12) [GET]
  Parameters: {"project_id"=>"my_project_id", "action"=>"index", "controller"=>"issues"}
Rendering template within layouts/base
Rendering issues/index

ActionView::TemplateError (new_project_query_url failed to generate from {:controller=>"queries",
:action=>"new"} - you may have ambiguous routes, or you may need to supply additional parameters f
or this route.  content_url has the following required parameters: ["projects", :project_id, "quer
ies", "new"] - are they all satisfied?) on line #41 of app/views/issues/index.html.erb:
38:     <%= link_to_function l(:button_apply), 'submit_query_form("query_form")', :class => 'icon
icon-checked' %>
39:     <%= link_to l(:button_clear), { :set_filter => 1, :project_id => @project }, :class => 'ic
on icon-reload'  %>
40:     <% if @query.new_record? && User.current.allowed_to?(:save_queries, @project, :global => t
rue) %>
41:        <%= link_to_function l(:button_save), "$('query_form').action='#{ @project ? new_proje
ct_query_path : new_query_path }'; submit_query_form('query_form')", :class => 'icon icon-save' %>
42:     <% end %>
43:     </p>
44: <% end %>

    (eval):21:in `new_project_query_path'
    app/views/issues/index.html.erb:41
    app/views/issues/index.html.erb:11
    app/controllers/issues_controller.rb:92:in `index'
    app/controllers/issues_controller.rb:91:in `index'
    config/initializers/mongrel.rb:63:in `dispatch_cgi'
```

```
Rendering /home/my_user/rails_apps/redmine/public/500.html (500 Internal Server Error)
```

And finally, here are the versions list:

```
# RAILS_ENV=production ruby script/about
About your application's environment
Ruby version              1.8.7 (x86_64-linux)
RubyGems version          1.6.2
Rack version              1.1.3
Rails version             2.3.14
Active Record version     2.3.14
Active Resource version   2.3.14
Action Mailer version     2.3.14
Active Support version    2.3.14
Edge Rails revision       unknown
Application root          /home/my_user/rails_apps/redmine
Environment               production
Database adapter          mysql
Database schema version   20110902000000
```

If anyone can point me in a direction to solve this, it will be very appreciated.

Thanks.

Revision 8892 - 2012-02-16 22:01 - Jean-Philippe Lang

Missing argument to new_project_query_path named route (#10254).

History

#1 - 2012-02-16 20:01 - Etienne Massip

- Category set to Issues

- Status changed from New to Confirmed

- Target version set to Candidate for next minor release

I thought nobody would never hit this one =)

Well, project_id can't be used as a short query param because it's expected to be potentially present in the URL path (i.e. in /projects/<project_id>/issues route).

Try using the long parameter form, that is: /issues?set_filter=1&f[]=project_id&op[project_id]=%3D&v[project_id][]=<your_project_id>

It can be fixed by renaming path parameter in routes.rb from "project_id" to anything else and by handling it in controllers.

Don't know if it's worth it fixing it.

#2 - 2012-02-16 20:22 - Jan Jachacz

Hi and thanks for the reply,

using the long parameter form didn't trigger the error 500 page and worked as expected but the situation is the same way with any project i'm creating. The issues link from the tab menu is not well generated.

eg: /issues?project_id=projtest

I looking for a place to change the generated link in the menu to change it to /projects/projtest/issues.

Thank you

#3 - 2012-02-16 20:31 - Etienne Massip

Hum...the issue I was talking about is not yours, yours is probably due to a plugin.

Try to restart Redmine with no plugin installed.

#4 - 2012-02-16 21:45 - Jean-Philippe Lang

- Target version deleted (Candidate for next minor release)

- Resolution set to Cant reproduce

Something like http://redmine.site.net/issues?project_id=my_project_id returns a 500 error indeed.
But this link should not be present in the menu. Did you change anything to config/routes.rb?

#5 - 2012-02-16 21:45 - Jean-Philippe Lang

- Status changed from Confirmed to New

#6 - 2012-02-16 22:02 - Jean-Philippe Lang

The 500 error is fixed in [r8892](r8892).
But still, you should not have these links everywhere. Something is wrong with your routes.

#7 - 2012-02-17 06:02 - manish tiwari

- Status changed from New to Resolved

- Assignee set to Anonymous

issues is fixed proparly

#8 - 2012-02-17 10:35 - Etienne Massip

- Assignee deleted (Anonymous)

#9 - 2012-03-06 11:25 - Etienne Massip

- Status changed from Resolved to Closed
