Target version:			
Resolution:	Duplicate		
Description <p>The List type for custom fields is a powerful feature, but would be handy to allow a List Multiple selection type also. My use case is for listing additional resource contacts for a given issue (who are external to our system and therefore can't be listed as the User type), though I'm sure it could come in handy for other situations as well.</p> <p>A Multiple User field could be very handy as well.</p>			
Related issues: <p>Is duplicate of Redmine - Feature #1189: Multiselect custom fields</p>

- Status changed from New to Closed
- Resolution set to Duplicate

Same as [#1189](#) which is already implemented for 1.4.0.
