Resolution:	Fixed		

Description

nil passed instead of message object to wiki macros in *textilizable* function for head topic or for preview in edit mode. It is caused by inproper call to *textilizable* in **messages\show.html.erb**, line **30**:

```
<%= textilizable(@topic.content, :attachments => @topic.attachments) %>
```

It should be corrected to

```
<%= textilizable(@topic, :content, :attachments => @topic.attachments) %>
```

For edit mode preview:

in file **messages\edit.html.erb**, line **15** should be changed from

```
:action => 'preview', :board_id => @board },
```

to

```
:action => 'preview', :board_id => @board, :id => message },
```

for correct *message* variable calculation in *MessagesController.preview* method
