

Redmine - Feature #1029

Special handling for .diff/.patch attachments

2008-04-09 22:04 - Rocco Stanzione

<b>Status:</b>	Closed	<b>Start date:</b>	2008-04-09
<b>Priority:</b>	Normal	<b>Due date:</b>	
<b>Assignee:</b>		<b>% Done:</b>	0%
<b>Category:</b>	UI	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>	0.8		
<b>Resolution:</b>	Fixed		
<b>Description</b> I suppose it's your webserver's mime type config, but if I click on a diff attached to an issue, the browser thinks it's a binary file and wants to download it. Even better than fixing that, I think, would be to treat it specially (like images) and view it in something like the SCM diff viewer.

One alternative to special treatment of \*.diff and \*.patch... what [Launchpad](#) does is give you a checkbox to say the attachment is a patch. This could also trigger an indicator that someone has attached a resolution to an issue, which could be of use to developers.

I suppose it's your webserver's mime type config

Actually it's not my webserver, download is forced unless the attachment is an image:  
[source:/trunk/app/controllers/attachments\\_controller.rb#L26](#)

#3 - 2008-06-14 17:29 - Jean-Philippe Lang

- Status changed from New to Closed
- Target version set to 0.8
- Resolution set to Fixed

Diff viewer added in [r1516](#).  
Rocco, the simplest way to tell that an issue is resolved is to mark it as 'Resolved' :-)
