

Redmine - Feature #1038

Add repo url to repository view

2008-04-10 20:11 - Carl Nygard

Status:	Closed	Start date:	2008-04-10
Priority:	Normal	Due date:	
Assignee:		% Done:	0%
Category:	SCM	Estimated time:	0.00 hour
Target version:			
Resolution:	Duplicate		
Description			
It's useful to know exactly which part of the repo a project is attached to. This patch adds the repo url from the configuration to the top "crumbs"

Nice idea.

In our case, however, redmine accesses the SVN as file whereas we want the users to see the [https:// form](#) of the repo.

I'm rather out of my element in ruby. What would it take to allow the published URL to be different than the internal access URL?

+1

We should have an internal repository url used by redmine bringing browsing capabilities and an external repository url displayed on the home page. A workaround is to create a custom field on project (e.g. SCM URL).

#3 - 2008-11-11 10:40 - Jean-Philippe Lang

- Target version deleted (0.8)

#4 - 2010-07-05 15:28 - Holger Just

- Status changed from New to Closed

- Resolution set to Duplicate

This is a duplicate of [#232](#).

The functionality is provided by my [Redmine Checkout plugin](#)
