Well, I don't understand neither can reproduce.

Comment is updated, isn't it?

Just edited mine ?!

#2 - 2012-03-07 16:52 - John Yani

Nope, can't edit my comment

#3 - 2012-03-07 16:53 - John Yani

The third step is actually "Click submit"

#4 - 2012-03-07 16:55 - Etienne Massip

See my previous comment?!

Yes, it's very strange.

Maybe it's because you have "Contributor" rights and I don't?

What you're saying is that you can see and click on the "Edit" link but when clicking on "Save" button, what? Nothing happen?

No, like I said:

Additional textarea is added with a label "Updated by [me] about a minute ago"

This edit should only appear if there is a conflict, right?

Ok, I got it.

Could you please post a screenshot of this textarea?

What is this browser, did you try with another one?

Do you have plugins installed that could interfere with normal behaviour?

I'm trying it on this redmine instance.

I'm using Chrome. I tried in Firefox and it does work. So maybe it's a bug in Chrome.

Oh, it's actually working in Chrome. Don't know what happened. Maybe it was a temporary issue.

Edit comment works.

- Status changed from New to Closed

- Resolution set to Invalid

Fine =)
