Description			
Before I applied 675 there were options in the Mail Notifications page to choose what events to send notifications on. After r675 the screen is blank except for a test mail message link.

Never mind you answered this in http://rubyforge.org/forum/forum.php?thread_id=17168&forum_id=7504.

We would still like the option to customize them as we really only want Issue notifications and none of the others.
