Revision 9246 - 2012-03-20 08:09 - Toshi MARUYAMA

pdf: enhanced issues list (#10464)

- Automatic calculation of the size of table columns depending on their content
- Output table header on each page

Contributed by Yuri Makarov.

History

#1 - 2012-03-16 10:47 - Yuri Makarov

- File *example-1.pdf* added
- File *example-2.pdf* added
- File *example-3.pdf* added

#2 - 2012-03-17 06:36 - Toshi MARUYAMA

- File *pdf-r9240.diff* added

This is a patch rebased on trunk [r9240](#).

#3 - 2012-03-18 09:02 - Toshi MARUYAMA

- File *issues-pdf-r9244.diff* added

This is a full patch for [r9244](#) which fixes conflict and source indents.

#4 - 2012-03-18 09:30 - Toshi MARUYAMA

- File *grouped-issues.pdf* added
- File *first-row.png* added

Note 3 patch first row of second page height is broken.

#	Project	Tracker	Statu
26	hg-crew-00	Bug	New
25	hg-crew-00 (41)	Bug	New
24	hg-crew-00 (41)	Bug	New
23	hg-crew-00 (41)	Bug	New

#5 - 2012-03-18 10:27 - Yuri Makarov

I can't test it now, my Redmine at work.

Some comments:

1. Comparing the diff's, I see in my pdf.rb line:

```
cv = issue.custom_values.detect {|v| ....
```

your version should be?:

```
cv = issue.custom_field_values.detect {|v| ....
```

2. Calculate the length of the text in my diff is based on the font page header. This is not correct. It almost does not affect the result, but leads to an increase in long columns of text. To correct this, use in **def calc_col_width**:

```
...
# by captions
pdf.SetFontStyle('B',8)
...
# by properties of issues
pdf.SetFontStyle("",8)
...
```

In this case, it may be necessary to add a constant of the column width for padding around the text, such as 5 mm.

```
col_padding = 5
col_width_min = query.columns.map {|v| pdf.GetStringWidth(v.caption) + col_padding}
...
x = pdf.GetStringWidth(w) + col_padding
...
n = pdf.GetStringWidth(v.rstrip) + col_padding
...
x = pdf.GetStringWidth(w) + col_padding
```

#6 - 2012-03-18 10:32 - Toshi MARUYAMA

Please create a patch to the trunk.

I rebased your patch to the trunk.

#7 - 2012-03-18 12:14 - Yuri Makarov

I can make a patch only tomorrow at work.

About first row of second page ..

Change from (about line 333 in trunk):

```
# make new page if it doesn't fit on the current one
space_left = page_height - base_y - bottom_margin
if max_height > space_left
  pdf.AddPage("L")
  base_x = pdf.GetX
  base_y = pdf.GetY
  render_table_header(pdf, query, col_width, row_height, col_id_width, table_width)
end
```

To:

```
# make new page if it doesn't fit on the current one
space_left = page_height - base_y - bottom_margin
if max_height > space_left
  pdf.AddPage("L")
  render_table_header(pdf, query, col_width, row_height, col_id_width, table_width)
  base_x = pdf.GetX
  base_y = pdf.GetY
end
```

This should fix the result.

#8 - 2012-03-19 11:37 - Yuri Makarov

- File pdf-1.diff added

Updated

#9 - 2012-03-19 23:09 - Terence Mill

+1

#10 - 2012-03-20 08:15 - Toshi MARUYAMA

- File pdf-issues-alignment.diff added

- Status changed from New to Closed

- Target version set to 1.4.0

I committed [r9246](#) to the trunk.

This commit is removed auto alignment.

I attach a patch for auto alignment.

I do not see the reason to change alignment.
