Description

Hello guys,

we have a problem with reposman.rb after upgrading to version 1.3.2

/opt/redmine/extra/svn/reposman.rb --redmine localhost --svn-dir /var/svn --owner apache --group apache --url
https://redmine.cypressdigitalmedia.com/svn/ --key=somekey --verbose

and answer is a
Unable to connect to http://localhost/sys/: Failed with 500 Internal Server Error

About your application's environment
Ruby version   1.8.7 (x86_64-linux)
RubyGems version   1.8.16

Rails version   2.3.14
Active Record version   2.3.14
Active Resource version   2.3.14
Action Mailer version   2.3.14
Active Support version   2.3.14
Application root   /opt/redmine
Environment   production
Database adapter   mysql
Database schema version   20120205111326

About your Redmine plugins
Redmine Checkout plugin   0.5
Global filter plugin   0.0.1

History

#1 - 2012-03-16 11:22 - Etienne Massip

- Category set to SCM extra

Please check your server and RM log files.

#2 - 2012-03-16 14:39 - Sasha Harutyunyan

- File log.txt added

Hello again

i've found some logs , please see attached log.txt file

#3 - 2012-03-16 15:12 - Etienne Massip

Could you try without plugins?
And if it is not working, could you try with mysql2 DB adapter?

#4 - 2012-03-17 19:33 - Sasha Harutyunyan

hello again

Disable plug-ins does not solve the problem

switching to mysql2 adapter is painfully . there is a some errors for activerecord-mysql2-adapter , and i am cannot instal it

#5 - 2012-03-17 21:54 - Jean-Philippe Lang

- Status changed from New to Closed

- Resolution set to Cant reproduce

Are you using 1.3.2.stable or 1.3.2.devel?

If you're using 1.3.2.stable, you shouldn't have a "identifier" column in the "repositories" table.
If you're using 1.3.2.devel, then your app/controllers/sys_controller.rb is outdated or you didn't properly restarted Redmine.

#6 - 2012-03-18 21:09 - Sasha Harutyunyan

Hi Jean-Philippe Lang,

Yes we are using stable release .. BTW deleting "identifier" column in the "repositories" table solves the problem .

Thanks
