Description

This adds a filter on the time entries for the logged member.

This helps to make your monthly or weekly report detailed by issues or other criterias for **all the projects**.

With a lot of members and projects it's impossible to see in the same time : the entries and the header columns (days names etc.).
Makes difficult see for example for one day, what were the issues were time was spent on.

I think this issue can be closed. A solution is provided by #10191. It's also related to #13157, because the proposed link in #13157 will show my time entries as desired.
