History

#1 - 2012-03-25 10:44 - Alan Chandler

- *File migrate.patch added*
- *Status changed from New to Resolved*
- *Assignee set to Alan Chandler*

As well as the issues report above and in [#10501](#) and [#10504](#) I found quite a few more issues - namely

- Normal Priority Issues get converted to High Priority in migration
- Projects marked as Private in Mantis where made public in Redmine
- Project Hierarchy was not respected
- The project identifier cuts out Upper Case characters - leaving some names pretty meaningless
- The issues updated_on field was set at the migration time rather than the time pulled over from Mantis
- The issue Created on field was left as an integer (in SQLite) rather than properly converted to a time.

I have fixed all of these and can now perform a complete migration with a good deal of success.

The Diff Patch between the version I have now and the 1.3.2 distribution is attached. (it superceeds the previous patches provided)
