

Redmine - Defect #10535

Atom feeds for the Project Activity contain incorrect hostname

2012-03-24 00:14 - Artem Sheremet

| | | | |

| Status: | Reopened | Start date: | |
| Priority: | Normal | Due date: | |
| Assignee: | Go MAEDA | % Done: | 0% |
| Category: | Feeds | Estimated time: | 0.00 hour |
| Target version: | | Affected version: | 1.3.0 |
| Resolution: | Fixed | | |
| Description | | | |
| The link in the Atom feed (at least for Project Activity) contains a hostname detected by Rails, but not the one specified in settings. This makes link unusable if the requests to Rails are proxified. | | | |

Associated revisions

Revision 19810 - 2020-06-04 16:23 - Go MAEDA

URLs in atom feeds don't take into account Setting.protocol and Setting.hostname (#10535).

Patch by Go MAEDA.

Revision 20683 - 2020-12-22 12:45 - Go MAEDA

Revert r20455 (#10535).

Revision 20684 - 2020-12-22 12:48 - Go MAEDA

Revert r20440 (#10535).

Revision 20685 - 2020-12-22 12:52 - Go MAEDA

Revert r19810 (#10535).

History

#1 - 2020-05-19 10:12 - Go MAEDA

- File `fix-10535-without-test.patch` added

- Status changed from New to Confirmed

Confirmed the issue. I think the links in the Atom feed should respect Setting.protocol and Setting.host_name.

The attached is a workaround for the issue.

#2 - 2020-05-19 14:12 - Go MAEDA

- File test-10535.patch added
- Target version set to Candidate for next major release

Updated tests.

#3 - 2020-05-30 11:31 - Go MAEDA

- Target version changed from Candidate for next major release to 4.2.0

Setting the target version to 4.2.0.

#4 - 2020-06-04 16:23 - Go MAEDA

- Status changed from Confirmed to Closed
- Assignee set to Go MAEDA
- Resolution set to Fixed

Committed the patch.

#5 - 2020-11-14 06:42 - Go MAEDA

- Related to Defect #17309: RSS feed gives away localhost link added

#6 - 2020-12-22 12:09 - Go MAEDA

- Status changed from Closed to Reopened

[r19810](#) generates incorrect links if Redmine is deployed using sub-URL.

For example, if ENV['RAILS_RELATIVE_URL_ROOT'] is '/dir' and Setting.host_name is 'example.net/dir', a link to an issue will be http://example.net/dir/dir/issues/1 ('dir' appears twice).

#7 - 2020-12-22 12:27 - Go MAEDA

Go MAEDA wrote:

[r19810](#) generates incorrect links if Redmine is deployed using sub-URL.

For example, if ENV['RAILS_RELATIVE_URL_ROOT'] is '/dir' and Setting.host_name is 'example.net/dir', a link to an issue will be http://example.net/dir/dir/issues/1 ('dir' appears twice).

And also app/views/journals/index.builder should have been changed to support Setting.host_name but [r19810](#) didn't.

I will revert the change.

#8 - 2020-12-22 12:52 - Go MAEDA

- Target version deleted (4.2.0)
