<b>Description</b>	
<p>Editing Wiki tables is not very convenient in Wiki syntax - and so far none of the WYSIWG editing plugins I have tested, worked properly.</p> <p>Falling back to raw editing I checked some services/tools to support excel to wiki transformations.</p> <p>Actually I am using <a href="http://excel2wiki.net">http://excel2wiki.net</a> which works quite okay for Excel tables inserted from clipboard, but it still needs some final modifications until it renders correct.</p> <p>Anyone else with a better solution?</p>
